Mastershield M50 Colour Tints

Mastershield M50 can be used as a chemically resistant protective coating for your garage floor. The base colours can be used as a stand alone look or you can add a partial flake to create a terrazzo look.

The Mastershield Polymer Flooring is a seamless decorative interior surface range for **domestic and commercial** applications. Available in a wide variety of colours and striking finishes, Mastershield can be customised to suit your décor.

Mastershield flooring systems are ideal for restoring uneven, cracked and eroding concrete floors. It is **extremely hard wearing**, hygienic, **easy to clean** with design flexibility.

NOTE: Mastershield colour tint when applied to Mastershield M50 opaque base, provide paler muted colours.

Colours represented are indicative only.

* With opaque base

A hard wearing surface solution for any interior flooring offering incredible versatility and durability.

Innovative Designs

Mastershield Polymer Flooring can be applied to most floors that have a firm surface. Suitable for internal areas such as Garage floors, home bars, entertainment areas, laundry and rumpus rooms. **Brings character and style to any room.**

The Protection Factor.

Mastershield is inherently a hard wearing flooring compound. The dense M90 polymer structure provides exceptionally high resistance to wearing.

Mastershield polymer flooring provides a protective layer from the absorption of water and oil spills. The smooth and seamless surface also makes it extremely easy to clean and maintain. For the chemical resistant levels please refer to the Technical Data Sheets for more information.

PRECAUTIONS AND LIMITATIONS
 Colours shown on this chart are to be used as a guide only. Colours illustrated are reproduced as close as modern printing techniques allow. Brochures and display pavements are intended as an indication only. As the ingredients within this product are derived from natural sources, colours may vary from batch to batch. Variations in colour and shading may also occur, depending on the job conditions, chosen texture and finishing practices employed by your applicator. When flake box opened, colours will appear lighter in the box.
